Ganzhou Sentai Bamboo & Wood Co,. Ltd is a leading manufacturer and solution provider of bamboo products. Established in 1998, our company has been providing high-quality bamboo products for customers around the world for almost 25 years. The factory has been accredited with ISO 9001, ISO 140001, and FSC. Our products have been performed and passed tests according to different BS, EN, and ASTM standards.

The company's range of bamboo products includes flooring, decking, indoor furniture, outdoor furniture, and structural products. More important, the company has been providing bamboo product application solutions for architects and designers around the world. Having been investing in research and development, we envision ourselves to be the leader in this industry.

Bamboo is a versatile, fast-growing, and sustainable resource that has been used in construction and design for thousands of years. In interior design, bamboo is often used in furniture, flooring, wall coverings, and other decorative elements. The look and feel of bamboo is warm, natural, and organic, adding a touch of nature to any room. The color and texture of bamboo can range from pale, blonde hues to dark, rich browns, and the material can be finished in a variety of ways to suit different design styles. Whether it's in the form of bamboo furniture, bamboo flooring, or other bamboo elements, a bamboo interior can create a calm, serene atmosphere in any space.

Technical Data:
•Density: ±1,200 ± kg/m3
•Janka hardness: 3,820 lbf
•Moisture content: 10%-14%
•Formaldehyde emission: Class E1---0.72 mg/m2.h (EN 717-2)
•FCS Certified available on request--FSC Certificate Code: C135631
•Fire-resistant available to Bfl-s1 class on request (En13501)
•Slipperiness: USRV Dry:48 / Wet:26 (EN 1339)
•Anti-slip properties: Class B (according with DIN 51097/ GUV-I 8527 for the smooth face) &Class C for the wave face decking)
•Durability test: CLASS 1 according to EN 350 / CEN/TS 15083-2, Class 4 for EN 335
•Fungi resistance: strong fungi resistance according to EN 846
•Water absorption and thickness swelling:
Water absorption: 4.8 %
Width swelling: 0.6%
Length swelling: 0.1%
Thickness swelling: 5.1% (ASTM D1037:2012)•
•Contribute to LEED
